

Block 1 Synthesis of hypotheses about IV

Literature review:
- **Task E** (Camille)

Illustrating concepts with simple theoretical models:
- **Task B** Spatial analysis (Camille)

Tests with empirical data:
- **Task A:** Clark2010 in the tropics
- **Task B:** Spatial analysis (Camille)
- **Task C:** Eucalyptus ExG

Guidelines

Article 1
Review and synthesis

Article 3

Article 2
E --> IV

Block 2 Tropical forest dynamics models with IV

Task D
Development of multispecies theoretical models

Task F
Intercomparison of data-based tropical forest dynamics simulators: TWOE, TROLL, PPA

Applications

Realistic forecasts of forest dynamics (eg. under climate change)

Article 4 Theoretical advances to help resolve the biodiversity paradox

Article 5 Integrating IV into forest dynamics simulators
